

Los 3 grupos con mayor riesgo de sufrir HPN deberían someterse a pruebas diagnósticas mediante citometría de flujo (detección de poblaciones celulares con déficit de GPI)^{2,4}

Grupos de alto riesgo para la HPN^{2,4,8}

Evaluar la alta actividad de la enfermedad (AAE) de los pacientes con HPN es crítico para mejorar su pronóstico^{6,7-13}

*N1=195; N2=176
